Global Ranking List to top coders

ABOUT US

Get ready to unlock the world of programming excitement with CodeVita!

Launched in 2012, TCS CodeVita is a global programming competition designed to identify top coders around the world. It's a dynamic contest that unites people from diverse backgrounds and cultures, shattering boundaries. The "Guinness Book of World Records" listed TCS CodeVita as 'The world's largest programming contest' with registrations from 98 countries/regions, proving it as a true global phenomenon.

In Season 11, participation soared to 444k+ contestants, representing 3,500+ institutes. Imagine participants from 10 regions engaging in an electrifying battle during the grand finale!

This year, we are "United by Code", celebrating a global community bound by the shared passion for programming. This season 12 promises more thrilling challenges and unforgettable experiences, highlighting the unity and diversity of coders worldwide.

Are you intrigued? Brace yourself for another extraordinary journey with TCS CodeVita, where coding transcends boundaries.

What's in it for students?

- Top 3 coders to win total prize money of USD 20,000
- Chance to explore exciting careers* with one of the world's most powerful brands
- Chance to compete with some of the best coders in the world
- Platform to showcase your programming skills
- Finalists stand a chance to travel to India for the season 12 live grand finale experience

*as applicable in the respective geographies

Eligibility

Current graduation or post-graduation students who are

- Studying in any stream of science or engineering
- Expecting to complete their course in the year of 2025, 2026, 2027 or 2028
- From any recognized institute across the globe

THE JOURNEY

Journey of a thousand miles begins with one step.

Codu and Sum Love

Obstacle Game

Given a $n \times n$ Array matrix (A) with $A[0][0]$ element as the starting point and any one element as the destination.

Problem Description

Given a $n \times n$ Array matrix (A) with $A[0][0]$ element as the starting point and any one element as the destination. Find the destination

1. A N by M matrix with N rows and M columns. All elements will be integers between -2 and 100.

2. Starting point A[0][0] value will be 'A'.
3. Destination value will be 'D'
4. There will be always 1 continuous route which can be straight or diagonal.
5. There are 4 types of hurdles and corresponding values :
 - a. Stone denoted by 'S'
 - b. Wall denoted by 'L'
 - c. Water denoted by 'W'
 - d. Thorn denoted by 'T'
6. Music provides mind peace. Which will be denoted by 'M'. It is not a hurdle.
7. The value of route will be 'R'.

Input

First Line contains dimension N of Matrix A.

Next N Lines, each contains N values delimited by space

Output

At every Step print the surrounded hurdles in ascending order of values. i.e. for every 'R' print the surrounding hurdles.

If there are no hurdles around step in the route, print 'NO HURDLES' for that step.

On reaching destination print 'DESTINATION'

Music 'M' is not a hurdle. It should not be included in output.

Constraints

$2 \leq N \leq 20$

Difficulty Level

Simple

Time Limit (secs)

Example 1

Input

4

A S L D

T R W R

R M S R

W R R M

Output:

L S S T W

T W

S W

S

S W

L S W

DESTINATION

Example 2

Input:

5

A S L W M

R S L D T

M R T R M

T L R M S

S L S W T

Output:

S S

L L S T T

DESTINATION
